

Heavy-Duty Plier Style Handpiece

Model: 10587

Description

Our Heavy-duty Plier-style handpiece has been recently redesigned to provide the user with the superior experience they've come to expect from American Beauty tools. Already the most robust resistance soldering handpiece available on the market, we have **quadrupled** the amount of heat-baffling, added **ergonomic** handle grips and created the ability for the handpiece to operate at a **90 degree angle**. We are confident that our upgraded Heavy-duty Plier-style handpiece will help to further cement American Beauty's reputation as the ultimate manufacturer of resistance soldering tools.

Features and Benefits

With the ability to turn the soldering adapters to a **90 degree angle**, you can now access even more locations with this robust hand-piece.

The redesigned hand-piece **quadrupled** the level of heat baffling, helping to ensure a comfortable user experience.

Ergonomically improved handle offers **improved grip** for the operator.

Carbon block electrodes generate **intense, localized heat** and can be easily customized to specific applications.

HEAVY-DUTY PLIER-STYLE HANDPIECE (Model 10587) HOW TO UTILIZE 90° ADAPTER FUNCTION

Making use of the 90 degree adapter function on your 10587 hand-piece requires only the use of the 1/8" Hex Key provided and following these 3 simple steps. Now, reaching those challenging joints is easier than ever.

Step 1

Turn your hand-piece on its side, locate the set screw & loosen.

Step 2

Remove adapter from the hand-piece. Locate alternate hole position.

Step 3

Slide the adapter over the shaft using the alternate hole & tighten the set screw. Repeat these steps for the other side.

CAUTION

·During use, Adapters can get quite hot. Ensure hand-piece has adequate cooling time prior to performing this change.

·Routinely check adapter's set-screw to ensure its snug.
